DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 & 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kolson et al (US Patent No. 6,240,735). Kolson discloses a rotary damper for controlling the flow of a fluid and comprising: a rotary damper assembly (10), an outer cylinder duct (12), an inner cylinder duct (14) adapted to be inserted within the hollow interior (20) of the outer cylinder in a nested manner that permits relative axial rotation, electromotive power (18) for slowing the inner cylinder duct and furthermore discloses an outlet aperture formed within side walls of each of the cylinders. These include a first outlet aperture with section (54 & 55), formed in sidewall (58) of the inner cylinder (14) and a second outlet aperture with sections (60 & 61) formed in the sidewall (62) of the outer cylinder (12).

Allowable Subject Matter

Claims 19 – 30 are allowed over the prior art of record.

Claims 2 –5 & 7-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion
